

Please, reject petition 04-160. Is there a legitimate reason to pass this bill? If so, I request a copy of said reason. Since I purchased my XM Radio, I have been a fan. They are a group of individuals who seem committed to providing their listeners with quality music, talk and services. I live in a small resort town in Wyoming and used to only have access to 3 local stations (which by the way are unskilled in the fine art of broadcasting). Now, I receive XM and have never looked back. The Traffic and Weather channels are a welcomed addition. I don't even live in an area where the traffic is covered, but I cannot imagine a reason to stop said service for those that it benefits. Is radio really that desperate? Why can't they just compete? Are they saying that they are the only ones who are allowed to provide traffic? That's a little silly, right? So, I respectfully urge you to reject this ridiculous petition and to support the innovative team at XM Radio. Thank-you. Cory Phillips
